Abstracts

A pivot hinge is typically unique to doors that are heavy or doors that require special installation. Rack and pinion pivot sets, for example, are designed to walk the door away from the jamb and toward the center of the opening so that it may swing open. This mechanism allows a fascia on the door front that won't bind with the jamb as the door is opened.

This report elaborates the market size, market characteristics, and market growth of the Pivot Hinge industry, and breaks down according to the type, application, and consumption area of Pivot Hinge. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Pivot Hinge in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.

In addition, chapters 8-12 consider the impact of COVID-19 on the regional economy.
