## Abstracts

The introduction of PLM software as a mobile application has become increasingly popular among consumer product manufacturing companies. These mobile applications increase the mobility and ease of use of PLM software in consumer product manufacturing companies. These applications can help companies track performance, using prototypes and samples of clothing, footwear and hard products. It also reduces costs and brings quality to the market faster.
This report elaborates the market size, market characteristics, and market growth of the PLM in Consumer Goods industry, and breaks down according to the type, application, and consumption area of PLM in Consumer Goods. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for PLM in Consumer Goods in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.
