## **Abstracts**

Portable Oxygen Concentrators are used to deliver oxygen therapy to the patients. The oxygen that is provided by portable oxygen concentrators has a higher level of concentration than ambient air. Portable oxygen concentrators have been used globally for decades now. The older versions of the portable oxygen concentrators were considered to be unreliable and difficult to use as they were bulky and costly. Over the years, portable oxygen concentrators have been evolved, as manufacturers are improving the design of them and by manufacturing them with a relatively smaller size & higher mobility. As the new generation, portable oxygen concentrators have become more mobile, the patients are able to carry them more freely as they can be accommodated in a car.

This report elaborates the market size, market characteristics, and market growth of the Portable Oxygen Concentrators industry, and breaks down according to the type, application, and consumption area of Portable Oxygen Concentrators. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Portable Oxygen Concentrators in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.

In addition, chapters 8-12 consider the impact of COVID-19 on the regional economy.
