## Abstracts

Powder coating is a type of coating that is applied as a free-flowing, dry powder. The main difference between a conventional liquid paint and a powder coating is that the powder coating does not require a solvent to keep the binder and filler parts in a liquid suspension form.

This report elaborates the market size, market characteristics, and market growth of the Powder and Liquid Coatings industry, and breaks down according to the type, application, and consumption area of Powder and Liquid Coatings. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Powder and Liquid Coatings in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.
