Abstracts

There are three main areas of powertrain testing: the hardware-in-the-loop and component battery test subsystems of the powertrain, which typically include simulations of other components that are not present in the test. These are often concentrated on the development of hardware systems such as engine/primer/transmission control systems.

This report elaborates the market size, market characteristics, and market growth of the Powertrain Testing industry, and breaks down according to the type, application, and consumption area of Powertrain Testing. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Powertrain Testing in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.
