Abstracts

Preserved Fresh flowers and foliage are natural flowers and greens that have been processed with a revolutionary technology to maintain their fresh appearance for several months or even years. Their beauty and soft delicate appearance makes it difficult to differentiate between cut flowers and the fresh look of our products.

This report elaborates the market size, market characteristics, and market growth of the Preserved Fresh Flower industry, and breaks down according to the type, application, and consumption area of Preserved Fresh Flower. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Preserved Fresh Flower in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.

In addition, chapters 8-12 consider the impact of COVID-19 on the regional economy.
