Abstracts

Procurement outsourcing is the transfer of specified key procurement activities relating to sourcing and supplier management to a third party — perhaps to reduce overall costs or maybe to tighten the company's focus on its core competencies. Procurement categorisation and vendor management of indirect materials and services (commonly referred to as Indirect procurement) are typically the most popular outsourced activity. This report elaborates the market size, market characteristics, and market growth of the Procurement Outsourcing industry, and breaks down according to the type, application, and consumption area of Procurement Outsourcing. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Procurement Outsourcing in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.
