Abstracts

Public safety network is utilizing LTE technology. LTE is a mature mobile broadband technology.

LTE is widely used by enterprises as well as public safety agencies for communicating with convenience. Due to the bandwidth limitations of traditional voice-centric LMR network systems, public safety agencies are interested in leveraging commercial cellular network technology to support the growing requirement of broadband applications. Considering its booming network, spectrum flexibility, and performance metrics, LTE has emerged as the leading entrant for public safety mobile broadband networks.
