Abstracts

A recliner is an armchair or sofa that reclines when the occupant lowers the chair's back and raises its front. And it has a backrest that can be tilted back, and often a footrest that may be extended by means of a lever on the side of the chair, or may extend automatically when the back is reclined.

This report elaborates the market size, market characteristics, and market growth of the Recliners industry, and breaks down according to the type, application, and consumption area of Recliners. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Recliners in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.
