Abstracts

Assignment includes the process from receiving a prescription to issuing a drug. This is an important process for patient care in a healthcare facility because all other processes prior to dispensing a prescription drug will be redundant if the drug is in error, such as an incorrect dose or improper packaging. As hospitals and retail pharmacies increase their investment in pharmacy automation solutions, the range of products such as robotic pharmacy prescription drug dispensing systems will increase significantly. This report elaborates the market size, market characteristics, and market growth of the Robotic Prescription Dispensing Systems industry, and breaks down according to the type, application, and consumption area of Robotic Prescription Dispensing Systems. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Robotic Prescription Dispensing Systems in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.
