## **Abstracts**

A rugged (or ruggedized, but also ruggedized) computer is a computer specifically designed to operate reliably in harsh usage environments and conditions, such as strong vibrations, extreme temperatures and wet or dusty conditions. They are designed from inception for the type of rough use typified by these conditions, not just in the external housing but in the internal components and cooling arrangements as well. This report elaborates the market size, market characteristics, and market growth of the Rugged Device industry, and breaks down according to the type, application, and consumption area of Rugged Device. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Rugged Device in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.
