## Abstracts

The purpose of sealing strips is to reduce the effect of the bundle bypass stream that flows around the outside of the tube bundle. They are usually thin strips of metal that fit into slots in the baffles and extend outward toward the shell wall to block the bypass flow and force it back into the tube bundle.

This report elaborates the market size, market characteristics, and market growth of the Sealing Strip industry, and breaks down according to the type, application, and consumption area of Sealing Strip. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.
