Abstracts

The purpose of the security policy is to provide more control and visibility into system settings and user activities, which can only be achieved if you have an effective way to manage security policies. A solution that automates security policy management is the most effective way to keep your policies up-to-date and ensure that policy exceptions are quickly identified and corrected.
This report elaborates the market size, market characteristics, and market growth of the Security Policy Management industry, and breaks down according to the type, application, and consumption area of Security Policy Management. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Security Policy Management in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.
