## Abstracts

In normal conditions, common centrifugal pumps are unable to evacuate the air from an inlet line leading to a fluid level whose geodetic altitude is below that of the pump. Self Priming Pumps have to be capable of evacuating air from the pump suction line without any external auxiliary devices.

This report elaborates the market size, market characteristics, and market growth of the Self Priming Pump industry, and breaks down according to the type, application, and consumption area of Self Priming Pump. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Self Priming Pump in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.
