## **Abstracts**

Logistics and supply chains for spare parts are different from those of finished products because the market for them is unstable. Many manufacturing companies are facing hindrances because of an increase in operational costs and a decline in demand from consumers. Vendors of logistics services should be efficient at services such as IT, data management, and supply chain management. Accurate forecasting of demand takes systematic and proper planning, purchasing, and ordering of logistics operations. This report elaborates the market size, market characteristics, and market growth of the Service Parts logistics industry, and breaks down according to the type, application, and consumption area of Service Parts logistics. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.
