## Abstracts

Sheet masks are face-shaped sheet fabrics soaked in nutrition-packed solution called serum. The sheet is made up of variety of materials including papers, fibers or gel types. These sheet masks are different from facial masks (paste type) that you only need to apply, take off or pat in extra serum instead of washing the paste after applying and putting on other skincare products. Sheet mask is generally used once and it is individually packaged, making them fast, convenient, and easy to use.

This report elaborates the market size, market characteristics, and market growth of the Sheet Mask industry, and breaks down according to the type, application, and consumption area of Sheet Mask. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Sheet Mask in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.
