Abstracts

Smart ticketing is the name given to the system where an entitlement to travel (or ticket) is stored electronically on a microchip rather than being printed on a paper ticket. In most smart ticketing schemes, the microchip on which a ticket is stored is embedded in a smartcard. For this reason, smart ticketing schemes are often known as smartcard schemes, although there is much more to the scheme than just the smartcard.

This report elaborates the market size, market characteristics, and market growth of the Smart Ticketing System industry, and breaks down according to the type, application, and consumption area of Smart Ticketing System.
