## Abstracts

Snowboards are boards where both feet are secured to the same board, which are wider than skis, with the ability to glide on snow. Snowboards widths are between 6 and 12 inches or 15 to 30 centimeters. Commercial snowboards generally require extra equipment such as bindings and special boots which help secure both feet of a snowboarder, who generally rides in an upright position. These types of boards are commonly used by people at ski hills or resorts for leisure, entertainment, and competitive purposes in the activity called snowboarding.

This report elaborates the market size, market characteristics, and market growth of the Snowboards industry, and breaks down according to the type, application, and consumption area of Snowboards. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.
