Abstracts

Social BI, or Social Business Intelligence, refers to the creation, publishing and sharing of custom business analytics reports and dashboards by end users of Cloud technologies.

Social or collaborative BI is the use of Enterprise 2.0 tools and practices with business intelligence outputs for the purpose of making collective decisions. First enabled by the rapid growth of social media networks in 2009, Social BI allows for the collaborative development of post user-generated analytics among business analysts and data mining professionals. This has removed previous barriers to self-service BI while still employing traditional analytics applications.

This report elaborates the market size, market characteristics, and market growth of the Social Business Intelligence industry, and breaks down according to the type, application, and consumption area of Social Business Intelligence. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Social Business Intelligence in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.
