Abstracts

A solder paste is essentially powder metal solder suspended in a thick medium called flux. Flux is added to act as a temporary adhesive, holding the components until the soldering process melts the solder and makes a stronger physical connection.

This report elaborates the market size, market characteristics, and market growth of the Solder Paste industry, and breaks down according to the type, application, and consumption area of Solder Paste. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Solder Paste in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.
