Abstracts

Sour gas refers to natural gas that contains significant amounts of acidic gases such as hydrogen sulfide and carbon dioxide (CO₂). It is preferable instead to have sweet gas because it does not contain such amounts of these contaminants. Sour Gas Sweetening refers to the process of desulfurization of acid gases.

This report elaborates the market size, market characteristics, and market growth of the Sour Gas Sweetening industry, and breaks down according to the type, application, and consumption area of Sour Gas Sweetening. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.
