Abstracts

Soybean fiber belongs to the category of regenerated plant protein fiber. Soybean fiber uses food grade soy protein powder as raw material. It uses bioengineering technology to extract protein globulin, and adds functional additives to connect with nitrile and hydroxyl polymers by branch, copolymerization, blending method, then form a certain concentration of protein spinning solution, which change the spatial structure of the protein.

This report elaborates the market size, market characteristics, and market growth of the Soybean Fiber industry, and breaks down according to the type, application, and consumption area of Soybean Fiber. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.
