Abstracts

Space Habitat is a concept intended for long-term settlement in outer space. This includes the development of colonies on the surface of other celestial bodies. Engineers and scientists are continuously working on developing various prototype designs to replicate ideal human settlements in the form of a space habitat. Earth provides a sustainable environment to support natural habitats that help living organisms thrive. Other celestial bodies do not provide the same support system as Earth.

This report elaborates the market size, market characteristics, and market growth of the Space Habitat industry, and breaks down according to the type, application, and consumption area of Space Habitat. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Space Habitat in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.
