Abstracts

Spiral stairs usually have armrests only on the outside and only have a center rod on the inside. The square spiral staircase presents a square stairwell and extends the steps and railings into a square, resulting in uneven steps. The pure spiral is a circular stairwell with equal steps and armrests and a spirally symmetric positioning. The compact spiral staircase with a central pole saves space in the use of floor space. This report elaborates the market size, market characteristics, and market growth of the Spiral Staircases industry, and breaks down according to the type, application, and consumption area of Spiral Staircases. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Spiral Staircases in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.
