Abstracts

Aerosol paint (also called spray paint) is a type of paint that comes in a sealed pressurized container and is released in an aerosol spray when depressing a valve button. A form of spray painting, aerosol paint leaves a smooth, evenly coated surface, unlike many traditional rolled or brushed paints. Standard sized cans are lightweight, portable, cheap, and easy to store. Aerosol primer can be applied directly to bare metal and many plastics.

This report elaborates the market size, market characteristics, and market growth of the Spray Paints industry, and breaks down according to the type, application, and consumption area of Spray Paints. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Spray Paints in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.
