Abstracts

A shipping container is a container with strength suitable to withstand shipment, storage, and handling. Shipping containers range from large reusable steel boxes used for intermodal shipments to the ubiquitous corrugated boxes. In the context of international shipping trade, 'container' or 'shipping container' is virtually synonymous with 'intermodal freight container,' a container designed to be moved from one mode of transport to another without unloading and reloading.

This report elaborates the market size, market characteristics, and market growth of the Storage Container industry, and breaks down according to the type, application, and consumption area of Storage Container. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Storage Container in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.
