Abstracts

The Storage Controller is the component of eucalyptus that manages EBS volumes. Eucalyptus uses the iSCSI protocol to connect EBS volumes to instances, and uses standard linux commands for configuring and exporting the volumes to instances. Volumes are represented as files on the filesystem of the machine hosting the SC. The SC manages creating, deleting, snapshotting, and exporting volumes in response to both user commands and system operations.

This report elaborates the market size, market characteristics, and market growth of the Storage Controller industry, and breaks down according to the type, application, and consumption area of Storage Controller. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.
