## **Abstracts**

Structured data archiving (SDA) software moves data from custom-provided or commercially provided applications to an alternate file system or database management system (DBMS) while maintaining data access and referential integrity. Reducing the volume of data in production instances can improve performance and shrink batch windows. It can also reduce storage acquisition costs, facility requirements, environmental footprints and the cost of preserving data for compliance when retiring applications.

This report elaborates the market size, market characteristics, and market growth of the Structured Data Archiving & Application Retirement industry, and breaks down according to the type, application, and consumption area of Structured Data Archiving & Application Retirement. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Structured Data Archiving & Application Retirement in a special period.
