## Abstracts

A studio is a relatively controlled environment, where you often are given a second chance if the result is not completely satisfactory. For that reason your expectations of the result will, of course, also be much higher. That means the desire for clarity, definition and low noise has no upper limit. Recording classical symphonies in a large concert hall setting, has different challenges than recording rhythmic bands in a studio, but still great sound starts with great microphones.

This report elaborates the market size, market characteristics, and market growth of the Studio Microphone industry, and breaks down according to the type, application, and consumption area of Studio Microphone. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Studio Microphone in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.
