Abstracts

A closed container of Styrofoam creates a “cold zone” into which heat from the outside enters at a very slow rate. Styrofoam has good insulating properties because it has millions of tiny air bubbles that slow the progress of heat through the material.
This report elaborates the market size, market characteristics, and market growth of the Styrofoam Coolers industry, and breaks down according to the type, application, and consumption area of Styrofoam Coolers. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.
