Abstracts

Sultanas, sometimes just called golden raisins, are golden-colored dried grapes that are made from various varieties of seedless white-fleshed grapes. The skin of these fruits start off as pale yellow in color, but unlike raisins, don't darken in the same way as they dry. Compared to raisins, sultanas also easily absorb liquid, but are smaller and slightly sweeter. Sultanas are used in the same ways with other raisins.

This report elaborates the market size, market characteristics, and market growth of the Sultana (Raisin) industry, and breaks down according to the type, application, and consumption area of Sultana (Raisin). The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Sultana (Raisin) in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.

In addition, chapters 8-12 consider the impact of COVID-19 on the regional economy.
