Abstracts

Terrazzo originated in Italy, where marble-workers would take the crumbs of their work home, mix them with cement and create faux-stone floors for their terraces. Since then, terrazzo floors have grown into an art form all their own with a wide range of styles and possibilities. Classic terrazzo is a mixture of marble fragments, called the aggregate, and a cementations binding agent, called the matrix. It is resilient and can be used inside and outside and it can be cast in place or laid in manufactured tiles.
This report elaborates the market size, market characteristics, and market growth of the Terrazzo Flooring industry, and breaks down according to the type, application, and consumption area of Terrazzo Flooring. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Terrazzo Flooring in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.
In addition, chapters 8-12 consider the impact of COVID-19 on the regional economy.

Key players in the global Terrazzo Flooring market covered in Chapter 13:
