Abstracts

Thermal transfer overprinters are used to print on many types of flexible packaging materials and some rigid substrates as well. Thermal transfer technology allows for continuous or intermittent printing of date codes, batch codes, bar codes, text and other graphics. This printing technology is ideal when the print quality of thermal transfer printing is required in-line for printing of variable information and real-time data. With this technology, a thermal printhead transfers heat through thermal transfer ribbon to mark the substrate clearly and quickly.

This report elaborates the market size, market characteristics, and market growth of the Thermal Transfer Overprinters industry, and breaks down according to the type, application, and consumption area of Thermal Transfer Overprinters. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Thermal Transfer Overprinters in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.
