## Abstracts

TCON is also called logic board, screen driver board, and center board. At present, the main domestic general TCON board brand has visual display optoelectronics. The function of the TCON board is to input the LVDS image data input signal sent by the digital board (the input signal includes three types of signals: RGB data signal, clock signal and control signal) through the logic board, and then convert it into an LVDS signal capable of driving the liquid crystal screen, and then Directly sent to the LVDS receiver chip of the LCD screen.

This report elaborates the market size, market characteristics, and market growth of the Timing Controllers industry, and breaks down according to the type, application, and consumption area of Timing Controllers.
