Abstracts

Tipper is used for transporting loose material (such as sand, gravel, or demolition waste) for construction. A typical dump truck is equipped with an open-box bed, which is hinged at the rear and equipped with hydraulic rams to lift the front, allowing the material in the bed to be deposited ('dumped') on the ground behind the truck at the site of delivery.

This report elaborates the market size, market characteristics, and market growth of the Tipper industry, and breaks down according to the type, application, and consumption area of Tipper. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Tipper in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.
