Abstracts

Triflusal is a 2-acetoxy-4-trifluoromethylbenzoic acid and it is an aspirin chemically-related molecule but not a derivative. The benefits of this agent are the lack of action over the arachidonic acid pathway, the driven production of nitric oxide and the increase of cyclic nucleotide concentration on endothelial cells.

This report elaborates the market size, market characteristics, and market growth of the Triflusal industry, and breaks down according to the type, application, and consumption area of Triflusal. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Triflusal in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.
