Abstracts

Trikes are basically three-wheeled motorcycles, which are used for leisure and cruising. The three-wheeled motorcycle is also called as the trike. The concept of trike originated from the time automobile pioneer, Karl Benz, introduced his first modern car, the Benz Patent Motor Wagen, which had only three wheels. Trikes are compact and inexpensive. The first three-wheel car came after World War II when people looked for cheap transportation modes in Europe.

This report elaborates the market size, market characteristics, and market growth of the Trike industry, and breaks down according to the type, application, and consumption area of Trike. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Trike in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.
