## Abstracts

Cancer patients are afraid of such adverse reactions as nausea and emesis caused by chemotherapy. Severe nausea and vomiting will make future chemotherapy a daunting experience for patients. They may even feel unwilling or give up further chemotherapy, which will make chemotherapy difficult to continue. 5-HT<sub>3</sub> receptor antagonist, an antiemetic, acts by competitively preventing 5-HT from combining with 5-HT<sub>3</sub> receptor. This report elaborates the market size, market characteristics, and market growth of the Tropisetron industry, and breaks down according to the type, application, and consumption area of Tropisetron.
