Abstracts

TV refers to the use of electronic technology and equipment to transmit active image pictures and audio signals, that is, television receivers, and is also an important broadcast and video communication tool. Video refers to a variety of techniques that capture, record, process, store, transmit, and reproduce a series of still images as electrical signals. When continuous image changes exceed 24 frames per second, according to the principle of visual persistence, the human eye cannot distinguish a single static image; it appears to be a smooth continuous visual effect, such that the continuous picture is called video.

This report elaborates the market size, market characteristics, and market growth of the Tv And Video industry, and breaks down according to the type, application, and consumption area of Tv And Video. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Tv And Video in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.
