## Abstracts

An autonomous underwater vehicle, or AUV, is a self-propelled, unmanned, untethered underwater vehicle capable of carrying out simple activities with little or no human supervision. AUVs are often used as survey platforms to map the seafloor or characterize physical, chemical, or biological properties of the water.

This report elaborates the market size, market characteristics, and market growth of the Untethered Autonomous Underwater Vehicle industry, and breaks down according to the type, application, and consumption area of Untethered Autonomous Underwater Vehicle. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.
