Abstracts

A vacuum interrupter is a switch that uses electrical contacts in a vacuum. It is the core component of medium voltage circuit breakers, generator circuit breakers and high voltage circuit breakers. The separation of the electrical contacts results in a metal vapor arc that quickly extinguishes. Vacuum circuit breakers are widely used in utility power transmission systems, power generation units and power distribution systems for railways, electric arc furnace applications and industrial equipment.

This report elaborates the market size, market characteristics, and market growth of the Vacuum Interrupter industry, and breaks down according to the type, application, and consumption area of Vacuum Interrupter. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Vacuum Interrupter in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.
