Abstracts

Variable speed pumps let user control speed, whether low or high speed, or anywhere in between. Most of these energy-saving pumps are driven by a different type of motor (known as a permanent magnet motor) from the first two pumps. This type of motor is used in magnetic resonance imaging (MRI) machines and electric vehicles. It is usually more efficient than induction motors in single and two speed pumps.

This report elaborates the market size, market characteristics, and market growth of the Variable-speed Pump industry, and breaks down according to the type, application, and consumption area of Variable-speed Pump. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Variable-speed Pump in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.
