Abstracts

A vessel traffic service (VTS) is a marine traffic monitoring system established by harbor or port authorities, similar to air traffic control for aircraft. Typical VTS systems use radar, closed-circuit television (CCTV), VHF radiotelephony and automatic identification system to keep track of vessel movements and provide navigational safety in a limited geographical area.
This report elaborates the market size, market characteristics, and market growth of the Vessel Traffic Services (VTS) industry, and breaks down according to the type, application, and consumption area of Vessel Traffic Services (VTS). The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.
