Abstracts

Veterinary reference laboratories offers various routine and specialty testing services that streamline the diagnosis, evaluation, and monitoring of animal diseases and disorders for veterinarians, pet owners, livestock producers, and research institutes. A majority of the services are provided by commercial facilities such as veterinary reference laboratories, hospitals and clinics, and in-house pet care services. Veterinary reference laboratories receive samples for analysis from various small/large hospitals, private practitioners, clinical research sites, and insurance companies, on which they carry out complex and specialized diagnostic tests to determine the health of animals. This report elaborates the market size, market characteristics, and market growth of the Veterinary Reference Laboratory industry, and breaks down according to the type, application, and consumption area of Veterinary Reference Laboratory. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Veterinary Reference Laboratory in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.
