Abstracts

Video Surveillance as a Service is a web-hosted wireless security system that allows users to remotely store, manage, record, play and monitor surveillance video - completely in the cloud. The lens is not stored in the field, users do not need to record software, only IP camera system, Internet connection and VSaaS provider. How does VSaaS work? VSaaS is a remote method for video surveillance systems, not a live video security system. With VSaaS, the IP camera is installed in the desired location and the security lens is transmitted to the provider's site. Because VSaaS is managed in the cloud, users can access footage or cameras from anywhere on the desktop, laptop or mobile device.

This report elaborates the market size, market characteristics, and market growth of the Video Surveillance and Vsaas industry, and breaks down according to the type, application, and consumption area of Video Surveillance and Vsaas. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Video Surveillance and Vsaas in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.
