Abstracts

Virtual router is a software-based system that does everything your hardware router can do (and some things it can't). A virtual router like Connectify Hotspot can broadcast WiFi right from your PC, so that any other WiFi-enabled device can get online.

This report elaborates the market size, market characteristics, and market growth of the Virtual Router industry, and breaks down according to the type, application, and consumption area of Virtual Router. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Virtual Router in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.

In addition, chapters 8-12 consider the impact of COVID-19 on the regional economy.
