Abstracts

Volatile organic compounds (VOC) recovery units are used to recover vapor of compounds including natural gas, gasoline and several others. In the chemical industry, these units find application primarily in the downstream and upstream processes. Owing to high return on investment and low cost of installation, VOCs are widely used in upstream and downstream process.

This report elaborates the market size, market characteristics, and market growth of the VOC Recovery and Abatement industry, and breaks down according to the type, application, and consumption area of VOC Recovery and Abatement. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for VOC Recovery and Abatement in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.
