## **Abstracts**

Fitted carpet, also wall-to-wall carpet or carpeting, is a carpet intended to cover a floor entirely. Carpet over 4 meters in length is usually installed with the use of a power-stretcher (tubed or tubeless). Fitted carpets were originally woven to the dimensions of the specific area they were covering. They were later made in smaller strips, around the time stair carpet became popular, and woven at the site of the job by the carpet fitter. These carpets were then held in place with individually nailed tacks driven through the carpet around the perimeter and occasionally small rings in the carpet which were folded over.

This report elaborates the market size, market characteristics, and market growth of the Wall-To-Wall Carpets industry, and breaks down according to the type, application, and consumption area of Wall-To-Wall Carpets. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Wall-To-Wall Carpets in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.
