Abstracts

Wet blasting machines are used to grind media and compressed air to achieve the desired finish on selected surfaces. Wet blasting uses liquids to increase surface finish. The advantage of including water is that the wet blasting machine becomes more consistent and smooth. The wet blasting machine has a separate system that includes a slurry that uses grinding media and water to degrease the surface in a single operation. This report elaborates the market size, market characteristics, and market growth of the Wet Blasting Machines industry, and breaks down according to the type, application, and consumption area of Wet Blasting Machines. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Wet Blasting Machines in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.
