## Abstracts

Wheat is one of the most important staple crops that is readily cultivated worldwide. The crop is a high-volume, low-profit seed crop and is produced primarily by heavily subsidized government seed programmes. Wheat seed production differs from wheat grain production in aspects such as land requirement, isolation, rogueing, and prevention of contamination and limitations of generations.

This report elaborates the market size, market characteristics, and market growth of the Wheat Seeds industry, and breaks down according to the type, application, and consumption area of Wheat Seeds. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Wheat Seeds in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.

In addition, chapters 8-12 consider the impact of COVID-19 on the regional economy.
